Teaching and Learning Policy 2023-2024

“The greatest impact on learning is the daily lived experiences of students in classrooms, and that is determined much more by how teachers teach than by what they teach.” Dylan William

Rationale

The Teaching and Learning Policy is based on the core principle of all pupils to ‘be the best you can be’. Teaching and learning is at the heart of the College Strategic Plan and underpins the college priorities. All students should receive high quality teaching and learning across the curriculum enabling them to achieve their maximum potential.

To achieve our focused goal of 'be the best you can be', our strategic plan instructs staff to enable great learning and successful outcomes. The College Values underpin the Teaching and Learning Policy:

- ☐ **Resilience** – Staff persist in having high expectations of all students in all key stages to be certain that no student will underachieve. Students are resilient, have high expectations of themselves and work towards their learning goals.
- ☐ **Respect** – Staff plan engaging and effective lessons and students respect others' learning. A mutual respect of teacher and learner will produce an optimal outcome.
- ☐ **Success** – Common goal with clear success criteria will be a key teaching principle. Well planned lessons with engaging, age-appropriate activities will lead to successful outcomes.

These values ensure that students are always: In the right place, at the right time, doing the right thing.

Countesthorpe Academy Approach

This policy has been developed within a period of consultation which has included the T&L Leads. We have four core principles:

- ☐ Assessment for Learning
- ☐ Preparation for Learning
- ☐ Engagement for Learning and
- ☐ Behaviour for Learning

The main aim of the core principles is for all students to achieve their potential regardless of their starting point:

- ☐ All teachers will implement the learning cycle of; Connect, Grasp, Demonstrate, Review within their planning, resources and teaching activities as best practice. This may be over

more than one lesson, or during a series of lessons. The learning cycle stickers can be used as appropriately as a prompt for teacher lesson planning and for student understanding.

- ☐ During all lessons there will be opportunity to demonstrate the school's values of; Respect, Resilience and Success, overtly planning to develop character.

Aims

- ☐ To ensure that all teachers are equipped to plan and deliver effective high-quality teaching for all students, based on cognitive science and research
- ☐ To ensure students receive lessons that motivate them to make progress
- ☐ To embed a clear and consistent approach to teaching and learning
- ☐ To implement a whole-school, integrated approach to building character, self-regulation, student agency and independence

Expectations

Teachers are expected to plan lessons that use a range of teaching methods and strategies (see staff development handbook).

Lessons allow all students to;

- Make progress
- Demonstrate respect, resilience and success
- Respond to teacher's feedback to make progress and close knowledge gaps

Lessons allow teachers to;

- Set high expectations for all (teach to the top – including PP and SEN)
- Share their passion for the subject
- Use proven teaching strategies that engage, stretch and challenge
- Develop their practice, harnessing ideas from cognitive science and research
